

### Is KLASS suitable for use in Shower screens?

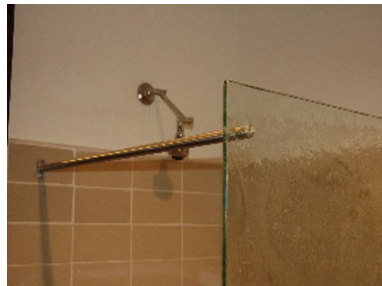

#### Yes!

Yes, like most commercially manufactured spa baths and many modern baths, KLASS is manufactured from acrylic. Care needs to be taken not to expose KLASS to harsh chemicals, ammonia cleaners and abrasive products.

If KLASS is scratched, car polishes and cutting compounds will bring lustre back to the surface.

Local building code and standard safety regulations should be checked prior to installation.

Acrylic is not as rigid a product as toughened glass and as such has different fixing requirements. Whilst a frame is ideal, installation with fixings, spaced and positioned correctly, are satisfactory.
