

What can you cut KLASS with?

Being an acrylic product, KLASS is easily cut with a circular saw, jig saw or most types of reciprocating saws.

(Be mindful that using any type of this equipment can be dangerous, we recommend that only people whom have skills with this type of equipment attempt to cut or fabricate KLASS.

All personal protective equipment must be used and a safety assessment should be completed.)

KLASS offer a cut to size, polishing and drilling service for your safety and convenience.
